2 Using USB-M2K

For example: Embed Skype into USB-M2K.

2.1 Install Skype

- ▣ Download Skype software from www.skype.com.
- ▣ Double click Skype installation program to install it, select the destination folder to USB-M2K's "autorun" disk.

Note: If you have installed the Skype program in your computer, you just need to copy the whole folder "Skype" to autorun disk.

- ▣ Open the "autorun.inf" file in autorun disk, made "Skype.exe" as autorun program.

For example: The program "Skype.exe" is in the folder "Skype\Phone", you can write as below:

```
open0=Skype\Phone\Skype.exe
```

2.2 Connect USB-M2K to PC

- ▣ When USB-M2K is connected to PC, Skype program which was embedded will auto-run.
- ▣ Log in Skype with Skype account.

You can create a Skype account as shown below:

After software startup, the icon will appear to the system tray as shown below:

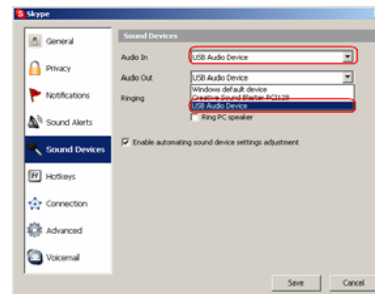

That indicates the Skype are successfully connected to Internet. If the icon is shown as , you have to check your Internet connection.

2.3 Connect ear-phone to USB-M2K

- ▣ Plug ear-phone into USB-M2K, then you can use it to talking.

2.4 Set USB-M2K to Skype Sound Devices

Execute “Tools->Options->Sound Devices” to open the window as below:

Set “Audio In” and “Audio Out” to “USB Audio Device”.

Now you can use skype as usual, and use ear-phone to talking.

Note: You just need to log in the Skype account for one time. When you want to use Skype program next time, you just need to plug USB-M2K to PC, and it can be used in different PC, no matter whether the PC have installed Skype program or not before.
